

HDJ3000

Hydraulic drum jacks

Maximum drum size with standard axle 2500mm diameter, 1100mm wide and 3 tonnes weight.

Built in drum guides stop drum bolts from fouling on the frames.

Track rollers built into the sliding adjustable carriage allow large capacity drums to rotate with ease.

Safety locking bolt secures axle in position. (see picture).

Frames are fitted with wheels to make them portable.

Provision is made for the axle to be carried on one of the frames.

All these features with convenience of hydraulic jacks makes the operation of unwinding large drums quick and easy.

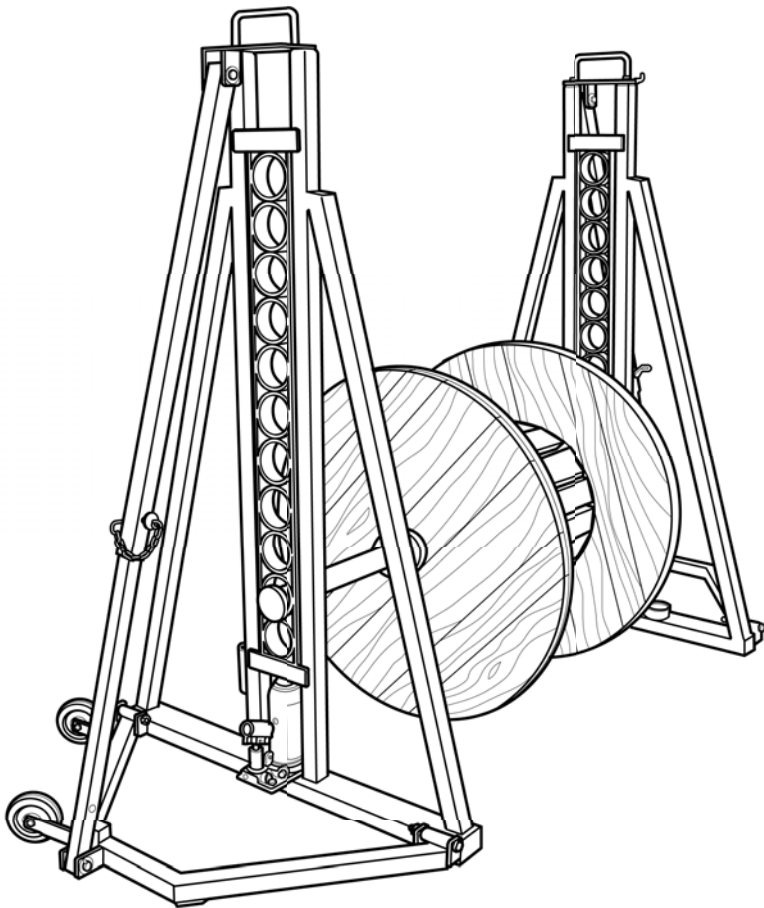

Finish – Powder Coat

Folding design of frame allows for easy transport and storage.

Dimensions

Height	1600mm
Width	930mm
Depth	670mm
Axle	50mm dia. X 1400mm
Total weight	82 kg

(Includes two frames and standard axle)
